## How to insert a new recipe

To insert a new recipe, go to the page **“Enter Recipe”** and fill out the form, after that click on **“Add Ingredient”** to insert a new ingredient and **“Add Step”** to insert a new step. You can do as much as you would like.

Attention: Some fields such as Quantity, Calories and Step number will check whether the value inserted is a number and if it meets the criteria, if not then a message box will be triggered to inform the user and the inserted value will be overwritten by 1.

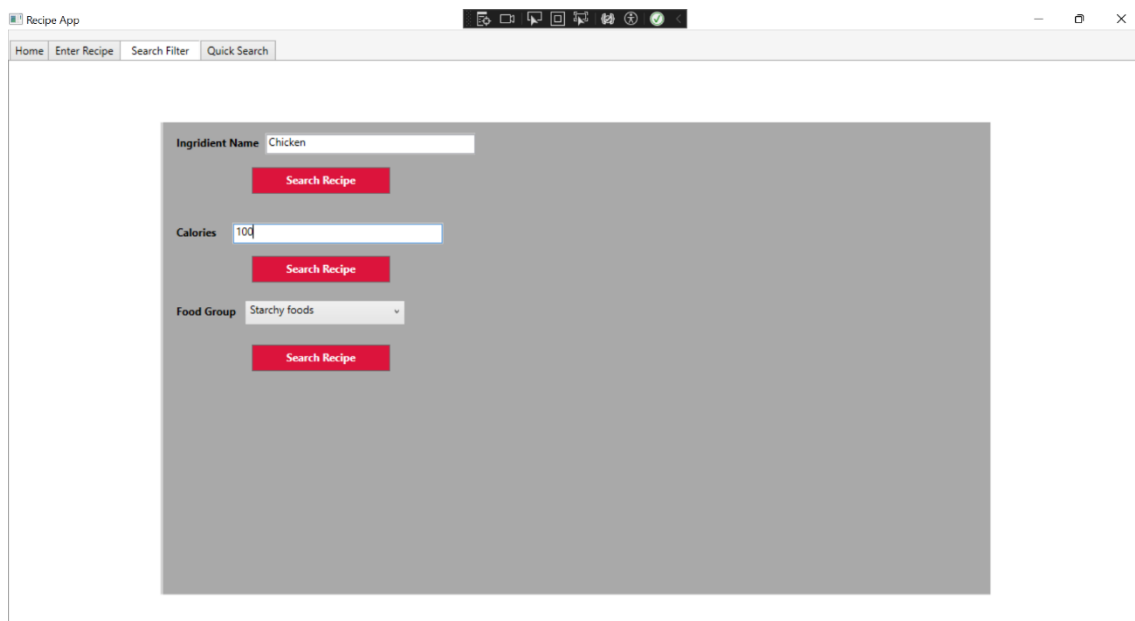

The screenshot shows a web application window titled "Recipe App" with a navigation bar containing "Home", "Enter Recipe", "Search Filter", and "Quick Search". The "Enter Recipe" page features a form with the following fields and controls:

- Recipe Name:** A text input field containing "Beef Stev".
- Ingredient:** A text input field containing "Rice".
- Unit of Measurement:** A text input field containing "kg".
- Quantity:** A text input field containing "1".
- Food Group:** A dropdown menu with "Starchy foods" selected.
- Calories:** A text input field containing "100".
- Step number:** A text input field containing "1".
- Description:** A large text area containing placeholder text: "BLA BLA BLA BLA BLA BLA BLA BLA BLA BLA KNVPNVINIRNV NII BLA".
- Buttons:** Two red buttons labeled "Add Ingredient" and "Add Step" are positioned at the bottom of the form.

## How to search recipe using Search Filter

To insert a search for a recipe, go to the page “**Search Recipe**”. There are three search filters which you can use to search for a recipe, the **Ingredient Name** must be the same as an ingredient in a recipe to return the recipe, the **calories** that will return any recipe with calories lower than or equal to the one inserted by the user and the **Food Group**, the user will select from a specific list of food groups and search if there is any recipe with an ingredient with that specific food group.

The screenshot shows a web application window titled "Recipe App". It has a navigation bar with four tabs: "Home", "Enter Recipe", "Search Filter", and "Quick Search". The "Search Filter" tab is active. The main content area is a light gray rectangle containing three search filters, each with a red "Search Recipe" button below it. The first filter is "Ingridient Name" with a text input field containing "Chicken". The second filter is "Calories" with a text input field containing "100". The third filter is "Food Group" with a dropdown menu showing "Starchy foods".

### Examples of output

The screenshot shows a window titled "Ingredients" with a close button (X) in the top right corner. The text inside the window reads: "Recipe Name: Beef Stew, Ingridient: Rice, Unit of Measurement: kg, Quantity: 1, Food Group: Starchy foods, Calories: 100".

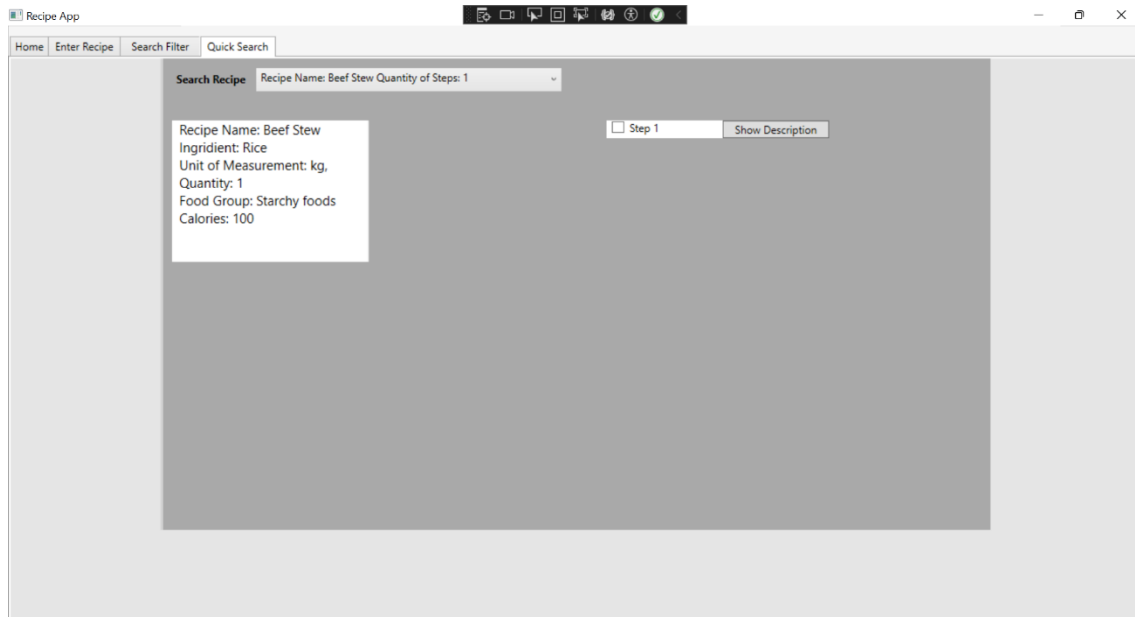

The screenshot shows a window titled "Ingredients" with a close button (X) in the top right corner. The text inside the window reads: "Recipe Name: Chicken Curry, Ingridient: Chicken, Unit of Measurement: kg, Quantity: 1, Calories: 60".

## How to use the quick search

The fastest and best way to search for a recipe.

Go to **“Quick Search”** and on **“Search Recipe”** you will be able to see the available recipes and their quantity of steps, the one chosen by the user will appear on the page.
